Miracle Type®

Learn to Touch Type in Just One Hour!

New Version 9 Released

Are you still a two or three finger typist? Do you hunt and peck at the keyboard and constantly have to look down? Frustrated by never being able to build up a decent speed? Miracle teaches you to Touch Type in the shortest time possible. Just One hour!

Miracle Type® cuts down your learning time!

How does it work?

Miracle Type uses 'mnemonics' or memory aids to teach you the keyboard layout in record time. All you have to remember is ten keywords and after just One hour you will be able to type using all 26 letters of the alphabet, plus the comma and full stop without looking down, albeit slowly initially.

Practice makes perfect:

Miracle Type provides an extensive range of specially designed word and sentence drills and speed and accuracy passages, to build up your speed fast.

Tried and tested method:

Miracle Type was developed as a result of over 20 years experience teaching people to Touch Type. Thousands of people have successfully learned to Touch Type using Miracle Type. Miracle Type is currently being used in a number of schools in the UK with great success.

Miracle Type gets great reviews:

Evaluated by:
Schoolzone.co.uk

Miracle Type "allowed many students to learn to type within that specified hour."

Recommended by:
Personal Computer World Magazine

Verdict: "Miracle Type is very intuitive and couldn't be easier to use"

The Times, Work Kit Column

Verdict: "The key to Touch Typing"

What customers are saying:

"I have tried other programs in the past, but in my honest opinion, nothing compares to Miracle Type V9. The very first stage teaches more in 5 minutes than any other software I've tried. Awesome, worth every cent I paid, plus some". Says Ric Moulder. Australia

“I mastered the keyboard in a day. I have tried learning to type before and other methods were taking weeks. The learning Method is very easy”. Says Max Garry of London.

“We have been using Miracle Type for a little while and whereas with previous typing tutors students found it hard to learn which finger to use for each letter, with Miracle Type it really can be learnt by most students in little more than an hour. This then enables them to begin to develop speed whilst using the correct fingers rather than single finger pecking.”

Peter Jermyn - ICT Coordinator - Queen Elizabeth's Girls' School (Barnet UK).

New features in version 9

- Completely New GUI: Further speeds up the process of learning to type.
- Dynamic target adjustment in Speed Builder.
- Word and sentence shuffle: Increase exercises by up to 5 times.
